

Healthy living starts with clean air.

The air inside your home or workplace can be up to five times more polluted than outdoor air. Invisible particles like dust, allergens, VOCs, and CO₂ quietly undermine focus, disturb sleep, trigger allergies, and raise long-term health risks.

Every breath of polluted air impacts productivity, wellbeing, and overall quality of life—making clean air not a luxury, but a necessity today.

Measure. Understand. Take Control.

ARVE transforms invisible pollutants into clear, actionable insights – so you can create safer, healthier spaces.

Temperature

Monitor comfort levels and improve energy efficiency.

Humidity

Help prevent mold growth and related health issues.

Particulate Matter (PM2.5 & PM10)

Measure fine particles to protect respiratory health.

CO₂ (Carbon Dioxide)

Maintain optimal ventilation and indoor air quality.

TVOCs (Total Volatile Organic Compounds)

Detect harmful airborne chemicals early.

Virus Transmission Risk Index (VTRI)

Real-time risk score based on air quality & occupancy data.

Breathe with Confidence

ARVE SENSE Pro
Swiss-engineered precision for
healthier indoor air.

Understand Data: Turn data into clear, meaningful insights

ARVE converts complex air-quality data into clear, actionable insights through an intuitive web dashboard and mobile app. Monitor trends over time, identify problem areas, and understand how your air quality changes throughout the day.

Take Control: Purify and Protect

ARVE lets you actively manage your indoor air. When paired with a purification system, the Swiss-Air-Autopilot automatically engages to clean and disinfect, removing pollutants, allergens, and pathogens.

The result is air as fresh as the Swiss Alps—enhancing focus, lowering infection risks, easing allergies, and promoting better sleep in homes, offices, schools, gyms, and clinics.

Measure: Understand your Air

ARVE continuously monitors your indoor environment, identifying pollutants, allergens, CO₂ levels, temperature, and humidity in real time. With accurate, reliable data, you gain clear insight into potential risks and can take informed action to protect your health.
